A couple of comments regarding the Action Memo(AM). There is no statements in there regarding why this is an ISE. All of the information is at least 3 years old. Nothing that has been looked at in the last 6 months that indicate an ISE now but not 3 years ago. In addition, I don't know if you looked at the contents of the tanks. There are 15 total. 4 of them empty. 4 contain hazardous substances. 7 contain other stuff. The AM just has a general statement regarding removal of the tanks. I don't know if we can justify that.
